

Homework 9 (5 points) Homework Due: Mon June 10 6AM – will take points off for late homework

Create a form that takes input from the user and updates your MySQL database with this information.

You should have an html file that gets the input and a php file that updates the database.

Please include along with the two files a snapshot of your database and a snapshot of the html.

*Zip up everything and rename your zip file **YourLastName_Homework9.zip** .*
