Homework 7 (5 points) Due Mon May 27, 2019 – Will take points off for late homework submission

Think of a database structure that you will be using for your final project.   Pattern it after the Customer database slide and please make sure it has at least 5 columns and 6 or 7 rows. Draw it out just with excel or a simple editor. Create a JSON file from it.

a) Write a json parse function to list contents of one of the columns.
b) Write a json stringify function to display the json contents
c) Please run this on the digital media server as well and put the link in the blog.
d) Zip up your files and submit it as part of homework 7, we are back to javascript & JSON, so your zip file should have javascript, html and JSON files,

*Please maintain the site structure with www being at the root and directories js, images and css underneath. Your index.html can go under the www folder. Compress this into a ZIP file called **YourLastName_Homework7.zip** and upload to your blog 6AM this coming Monday.*
